EXPLORE THE COURSE CONTENT

Comprising 6 independent certificate courses, the Diploma of Complementary Healthcare Products offers a well rounded understanding of the complementary healthcare industry. All certificates can be completed independently or as part of the Diploma of Complementary Healthcare Products.

Certificate in Foundation Studies for Complementary Healthcare Products

Specifically designed for the complementary healthcare industry, the Certificate in Foundation Studies for Complementary Healthcare Products is an introductory course for people without a background in health sciences. Introducing students to the complementary healthcare industry and the world of the human body, this course lays the foundation to understanding how nutritionals, herbals, homeopathics & flower essences impact the body.

Certificate in Complementary Healthcare Products – Nutritional Supplements

The Certificate in Complementary Healthcare Products – Nutritional Supplements provides graduates with a strong understanding of nutritional supplements available for retail sale in Australia. With a detailed description of individual nutritional supplements, students will graduate with practical and theoretical knowledge of nutritional supplements and their effect on the body.

Certificate in Complementary Healthcare Products – Herbal Supplements

Offering students the knowledge necessary to be able to speak meaningfully about individual herbal supplements, their main uses, key constituents, dosage and any adverse effects, this course strengthens understanding of the role of herbal supplements in everyday life.

Certificate in Complementary Healthcare Products – Homeopathics & Flower Essences

Providing students with sound understanding of homeopathic principals and their individual uses, students will graduate with confidence in accurately guide customers to the homeopathic that best suits their need. With Bach, Australian Bush & North American Flower Essences also covered in this course, students will graduate with a well rounded understanding of this often misunderstood area of the complementary healthcare industry.
